Chip and Kristine -

Is EPA going to request the model results that contributed to the statements made in the LWG's powerpoint presentation? Specific to my interests, they say a couple things about stormwater that indicate they did some runs to identify how the updated data set affected the output. I think this info could be VERY helpful in understanding the potential for stormwater to recontaminate harbor sediments.

We need to understand this issue ASAP so we can make sure our overall stormwater strategy (including our stormwater permits) will match up with the recontamination risk. Currently, we don't have the resources to come anywhere close to the type of info that could potentially come out of the LWG's modeling results.

I'd REALLY like to see these background materials - perhaps in the form of the videos LWG shared with us at the model calibration meeting a year ago. Please let us know if there is anything more we can do to support your efforts to acquire this information from the LWG. Thanks

Karen

Subject: EPA comments on Dec 14 FS tools presentations EPA comments on December 14 FS check-in presentations

EPA comments on the four topics presented by the LWG at the December 14 FS check-in are attached below. The cover letter and comments were sent to the LWG late Friday, January 28, 2011. Thanks to all who contributed comments. We expect to provide more specific direction on the FS (deliverables and schedule) in a separate response to the LWGs January 12, 2011 correspondence.
